

Mahesa Yuztar

I work across backend systems, interfaces, data, infrastructure, and the practical space between a client's request and a maintainable product.

EXPERIENCE

SISGO Global Teknologi, Sidoarjo — Software Engineer

March 2026 - PRESENT

- Contributed to the ongoing development and maintenance of a full-scale ERP System, with a strong focus on financial business logic including General Ledger, Auto-Posting, and COGS.
- Resolved critical bugs and improved system reliability, contributing to a 50% reduction in client complaints.
- Handled end-to-end product issues from requirement analysis and development to QA, deployment, and client troubleshooting.

Solveit.id, Malang — Backend Developer

July 2025 - February 2026

- Worked across 3 Laravel backend projects, translating client requirements into maintainable production systems.
- Built and maintained Midtrans integrations, complex CBT workflows, and RESTful APIs.
- Migrated applications from Laravel 10 to 12, including middleware and authentication updates.

PLN Nusantara Power, Malang — IT Intern

March 2025 - June 2025

- Supported IT infrastructure for power-generation operations through server monitoring and network maintenance.
- Assisted with switch/hub installation, network configuration, and infrastructure troubleshooting.

ACTIVITIES

Bimbingan Belajar Get Ready Malang, Malang — Teacher

September 2025 - December 2025

Universiti Teknologi Mara, Malaysia — Robotic Team Lead

August 2024 - September 2024

Universitas Negeri Malang, Malang — Teaching Assistant

January 2023 - June 2023

EDUCATION

Universitas Negeri Malang, Malang — Informatics Engineering

August 2022 - January 2026

PROJECTS

Budgeting — Personal Finance Management

A personal finance platform for managing multi-account balances, transactions, savings, debts, analytics, and financial reports, built with Next.js, Prisma, and Supabase. **Web Preview:** [budgeting-khaki.vercel.app](#)
